

TECNIBOX C-600

The Tecnibox container, available in both perforated and solid versions, is ideal for the storage, transportation and distribution of agricultural and industrial products.

It is manufactured using high-density injection moulded polyethylene and non-toxic environmentally-friendly materials.

Its stackable, interlocking design provides maximum safety for vertical stacking yet has the smallest of footprints.

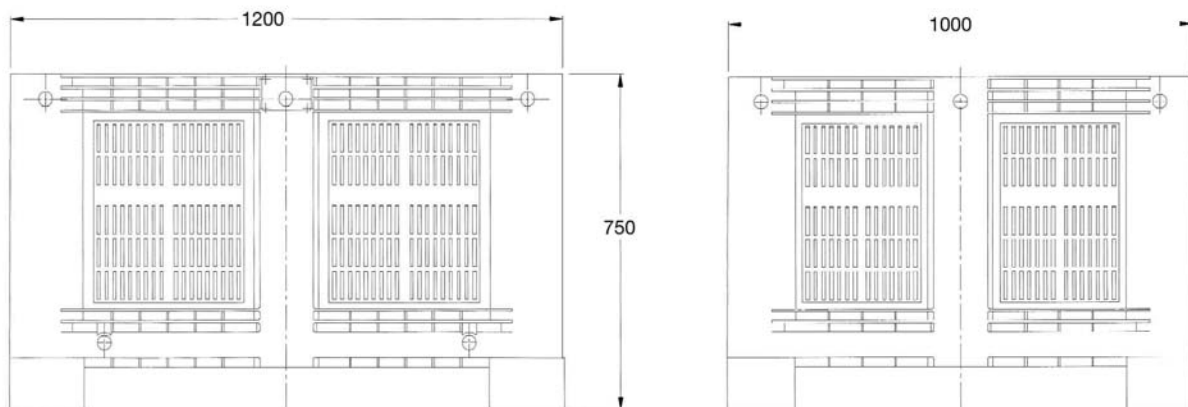

Its dimensions comply with European Regulations so Tecnibox can be used with nearly all mechanical

transport and lifting systems. With its simple, easy to handle design, Tecnibox is the perfect multi-purpose container for industries such as fresh produce, meat, industrial, canning, seafood, etc.

Contenur designs and manufactures its products in accordance with Quality Management certification ISO 9001, and the Environmental Management certification ISO 14001.

The Contenur Group guarantees the quality of all its products, and on client request can also offer a complete product maintenance programme. For more information, please contact our Technical Sales network.

TECNIBOX C-600
