

Portable Compressors **MOBILAIR M13-M350**

With the world-renowned SIGMA PROFILE ✱

Free air delivery 1.2 to 34.0 m³/min

Made in Germany

KAESER's renowned MOBILAIR range of portable compressors is manufactured in a state-of-the-art production facility located directly next to the KAESER main plant in Coburg, Northern Bavaria. Equipped with the very latest technology, the recently modernised portable compressor plant boasts TÜV (German Technical Inspection Agency) certified sound testing facilities for free-field sound

level measurement, an advanced powder coating installation and highly efficient production logistics. With minimal turn-around time, KAESER's highly qualified personnel are able to assemble portable compressors of all sizes and equipment levels to suit our customers' specific needs.

Compressed air as a versatile energy source

With 90 years experience in machine construction and engineering, KAESER KOMPRESSOREN is one of the world's leading compressor manufacturers and compressed air system providers. KAESER's comprehensive range of products and services ensures that every compressed air systems user will find a solution that meets his or her exact requirements.

Fluid circulation and compressed air production

- 1 Intake air
- 2 Rotary screw airend
- 3 Fluid/air mixture
- 4 Fluid separator
- 5 Fluid with compression heat
- 6 Thermostatic valve, or Anti-Frost Control with micro-fluid filter
- 7 Fluid cooler
- 8 Cool oil
- 9 Compressed air

Save energy with the KAESER SIGMA PROFILE

MOBILAIR 43 model shown

SIGMA PROFILE

Every KAESER rotary screw airend is equipped with energy-saving SIGMA PROFILE rotors. Components manufactured to the highest standards and precision aligned roller-bearings ensure long service life with maximum reliability.

User-friendly design

MOBILAIR portable compressors are simple to operate, provide excellent component accessibility and are easy to maintain. Features also include automatic monitoring and shutdown.

Patented Anti-Frost Control

Specially developed by KAESER for portable compressors, the patented Anti-Frost Control automatically regulates operating temperature in relation to ambient. This innovative system therefore prevents breakers from freezing up and significantly extends air-tool service life.

KAESER's comprehensive range of products and services

Compressed air system solutions for every application

Compact powerhouses

With petrol engines up to 15 bar

The smallest MOBILAIR compressors are more than capable of powering breakers, drills, saws, grinders, impact wrenches and even impact borers. The 15-bar version is the ideal choice for trenchless laying of glass fibre cables or for leakage tests. In addition, the compressor can be equipped with an external compressed air aftercooler for certain applications that may require cool and condensate-free compressed air.

MOBILAIR M13

Portable compressors

With the patented Anti-Frost Control

MOBILAIR portable compressor models with free air deliveries ranging from 2 to 5.6 m³/min ensure dependable performance even in cold conditions: KAESER's patented Anti-Frost Control automatically adjusts operating temperature according to ambient temperature. This system is therefore especially useful at times of the year when ambient temperatures are lower, as it protects air tools against freezing and significantly enhances both system availability and service life.

MOBILAIR M20 PE

Exceptional power and versatility

Compressed air and more...

The MOBILAIR portable compressors in this product group provide exceptional versatility. Optionally available with synchronous generators and / or compressed air treatment components, these compressors are also offered in various maximum pressure versions. This large selection of possible configurations therefore ensures that an appropriate model is available to meet the needs of virtually any application.

Efficiency and performance

With SIGMA CONTROL MOBILE

Available for MOBILAIR compressors with free air deliveries up to 34 m³/min, the innovative "SIGMA CONTROL mobile" compressor control system is simple to use and precisely matches motor power to actual compressed air demand. This significantly enhances both compressed air availability and fuel efficiency.

The environmentally-friendly alternative

With electric drive

MOBILAIR electric portable compressors truly come into their own in environments where quiet and exhaust-free work conditions are required. These environmentally-friendly compressors therefore elegantly avoid the restrictions that apply to the use of combustion engines.

MOBILAIR Accessories

- Electrical connection cable to towing vehicle and adapter (7 and 13 pole, 12 and 24V)
- 50 mm ball couplings and towing eyes available with diameters of 45, 68 and 76mm
- Various hose lines (separate or integrated with claw couplings)
- Hose lubricator with 1l capacity
- Centrifugal separator on support stand, optionally available with 4l tool lubricator
- Fluids, lubricants and filter sets

Genuine KAESER parts

As with all KAESER products, consumable and spare parts are quality tested to ensure best possible performance. Be safe in the knowledge that all components are guaranteed and are designed to meet the demands of the applicable operating conditions.

KAESER – The world is our home

As one of the world's largest manufacturers of rotary screw compressors, KAESER KOMPRESSOREN is represented throughout the world by a comprehensive network of branches, subsidiary companies and authorised partners in over 100 countries.

With innovative products and services, KAESER KOMPRESSOREN's experienced consultants and engineers help customers to enhance their competitive edge by working in close partnership to develop progressive system concepts that continuously push the boundaries of performance and compressed air efficiency. Moreover, the decades of knowledge and expertise from this industry-leading system provider are made available to each and every customer via the Kaeser group's global computer network.

These advantages, coupled with KAESER's worldwide service organisation, ensure that all products operate at the peak of their performance at all times and provide maximum availability.
