

HORIZONTAL SHUTTERING LINE

PERIMETER SCREENS

The perimeter screens are a good option for holding down the concrete in flat slab construction. Used as floor formwork complement and/or main beam to facilitate the concrete placement, allows it placement by folding legs which hammer in the board. A specific accessory is used for the joint between the screens.

SIZES	SCREEN (cm)	CORNER (cm)	COMPENSATION SCREEN
Lenght	100 / 150 / 200 / 250 / 300	50 X 50	100
Height	30 / 35	30 / 35	30 / 35
Leg number	2 / 2 / 3 / 4 / 5	2
